International Journal of Applied Power Engineering (IJAPE)

International Journal of Applied Power Engineering (IJAPE), p-ISSN 2252-8792, e-ISSN 2722-2624 focuses on the applied works in the areas of power generation, transmission and distribution, sustainable energy, applications of power control in large power systems, etc. The main objective of IJAPE is to bring out the latest practices in research in the above mentioned areas for efficient and cost effective operations of power systems and electrical energy sources. The journal covers, but not limited to, the following scope: electric power generation, transmission and distribution, utilization of electric power, energy conversion, electrical machinery, sustainable energy, insulation, solar energy, high-power semiconductors, power quality, power economic, FACTS, renewable energy, electromagnetic compatibility, electrical engineering materials, high voltage insulation technologies, high voltage apparatuses, lightning, protection system, power system analysis, SCADA, electrical measurements, and the electrical apparatus connected to such systems.

Beginning with **issue 1 of volume 10 (2021)**, the IJAPE will be published as a **three-monthly journal (4 issues/year)**.

Call for Editors: International Journal of Applied Power Engineering

Dear Professors and Doctors,

All research articles in IAES International Journal of Applied Power Engineering (IJAPE) undergo rigorous peer review, based on initial editorial screening and refereeing by at least two anonymous referees.

High quality scholarly communication of this nature requires the collaborative efforts of academics. The journal is professionally managed by a team of editors drawn from the academic and practitioner community for fixed periods, and a journal administrator. Hence IJAPE is calling for academics with sound academic background and who want to leave their footprints on the sand of time to serve as editors.

The primary responsibility of an editor will be to edit manuscripts after they have been peer-reviewed.

Thanks for the continuing interest in our work,

Best Regards,
IJAPE Management Team

Menu Pemberitahuan

Vol 10, No 3: September 2021

Each paper requires minor changes for it to be accepted. Editors will go through the revisions and gives a final approval. However, it is good to remember that "this status decision" does not guarantee acceptance. The paper will be accepted only if the editors are satisfied with the changes made.

Table of Contents

Articles

[Power quality improvement using a shunt active power filter based on an cascaded H-bridge eleven level inverter with predictive current control](#)
Yousfi Abdelkader, Abdelkader Chaker, Youcef Bot

[A Comparative Study on AC/DC Analysis of an Operational Low Voltage Distribution System](#)
Cihan KATAR, Cengiz Polat UZUNOGLU

[Five-Phase Induction Motor DTC-SVM scheme with PI controller, Fuzzy Logic controller and ANN controller](#)
ARUN KUMAR THAKUR, M GOPICHAND NAIK, S RAJENDRA PRASAD

[Experimental Platform Tests For Setting Performances of Distance Protection Installed In Biskra-Batna of The Algerian Transmission Line](#)
Belkacem Mahdad, Yassine Khelil, Abdelhak Tobbeche

[Calculation and Measurement of Ampacity for Class 5 Flexible Aluminum Cable at 110oC](#)
Fernando Esma Agustin, Akhtar Kalam, Aladin Zayegh
